"We estimate we now save about 2 1/2 hours for every 16 hours of operation. That's a great return on your money. The system itself, we paid this off in about 12 months. We've been very happy with the AirTrim system. It's been very effective for us and certainly most economical."

Matrix Twister™ Waste Removal System

Improve Your
Productivity
At Least 20%
with Our
Automated Waste
Removal System

The patented* Matrix Twister™ Waste Removal System is an automated method of pneumatically conveying PSA waste matrix and edge trim to a compactor, baler or other receptacle. The matrix is twisted into a rope, reducing the amount of exposed adhesive and strengthening the matrix for conveying.

Try It Before You Buy It

We are so sure the Matrix Twister™ Waster Removal System will improve your productivity that we encourage you to try a single-press rental unit to validate your productivity impact results with your machine and material prior to making a purchase decision.

Get a "Try It Before You Buy It" rental unit for a nominal fee of \$250 per week. Should you decide to purchase the unit or invest in a multi-press system, 10% of the rental costs will be applied to your purchase.

Top Ten Reasons to Automate Your Waste Windup Process

1. Eliminate press stoppages for waste roll changes.
2. Run your label press at higher speeds.
3. Reduce customer lead times.
4. Eliminate material lost from press re-registering.
5. Die cut more intricate labels; expand sales offerings.
6. Reduce back injuries.
7. Use narrower raw roll stock.
8. Eliminate fiber core costs.
9. Save valuable floor space.
10. Improve employee morale.

*Patent No. 6547913B1

Why the AirTrim Matrix Twister™ Is Superior

- ▲ Proven, patented* design (Ask for our reference list.)
- ▲ Our unique silicone-mist system lubricates the duct for ease of conveying. The silicone system...
 - Does not break down or smell with high temperatures.
 - Requires less housekeeping than oil or soapy water systems.
 - Uses less lubricant.
- ▲ Heavy duty, quality construction makes the Matrix Twister™ a true work horse that performs year after year.
- ▲ Our commitment to service is unparalleled.
- ▲ We offer a rental option with reasonable rates and credit toward purchase.

Two examples of how a Matrix Twister™ System can impact your productivity.

	Example #1	Example #2
1. Label press size (in inches)	7	10
2. Unwind raw material roll length (in feet)	12,000	12,500
3. Waste windup roll capacity (in feet)	4,000	4,500
4. Manual waste windup replacement time required (in minutes)	4	3
5. Press speed (in feet per minute)	125	350
6. Wasted material due to re-registering for each waste windup change (in feet)	325	275
7. Current raw material web width (in inches)	8	11

Based on the above data, an AirTrim Waste Removal System can dramatically improve your competitiveness		
Potential label production capacity increase	8.33%	16.80%
Potential reduction of material waste by eliminating re-registration	5.42%	4.40%
Potential raw material saving for using narrower width roll stock	6.25%	4.55%
Projected impact on productivity	20.00%	25.75%

How much can the Matrix Twister™ Waste Removal System improve your company's productivity?

Call or email us at Sales@AirTrim.com with your data in figures 1 through 7 above. At no cost or obligation, we'll project your productivity improvement and send you the results.
