

PERC? How it can save you money and make your job a little easier.

For on site Technical Support, AirTrim offers two options for your consideration – a **PERC Review** and a **PERC Audit**.

Pneumatic waste handling systems are one of the most efficient methods of conveying a wide variety of materials in an increasingly competitive environment. But over time they can diminish in performance. To ensure your system continues to do its job at peak efficiency, schedule an **economical PERC Review**.

A **PERC Review** analyzes:

- total system performance
- routine operational issues

For more extensive system analysis AirTrim offers a **PERC Audit**

Performance Analysis – Total system examination to analyze pervasive operational issues.

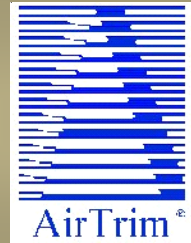

Environmental Impact Analysis – Reduce energy, noise, dust, vibration and static.

Root Cause Analysis – Examine results of Performance and Environmental Impact Analyses to determine root cause and recommend solutions.

Condition of Equipment Assessment – Review system components with recommendations of repair, upgrade or replacement as needed.

In addition, a CAD drawing of your system is included with the full report.

Most common pneumatic waste handling system problems arise from:

- Fan damage or wear
- Chopper knife damage or wear
- Chopper damage or wear
- Ductwork damage or slippage
- Separator plugging or damage
- Dust system overload
- Baler or compactor wear/damage
- Equipment relocation
- Material or product changes
- System modifications
- Process speed increase
- Damaged, loose pick-up points
- Control failures

What is the next step?

Call 1-888-247-8746 or email sales@AirTrim.com to discuss how a PERC could benefit you.

We look forward from hearing you!
