

# Model 2000 Silicone Mister System

For trouble-free conveying systems

**Tame** trim and matrix in pneumatic conveying waste handling systems.

- Maximize waste handling capacity
- Reduce unexpected conveying system plugging
- Retrofit easily to existing ductwork
- Economically priced
- Stock delivery

Extensive research has determined that pure food grade silicone best neutralizes the adhesive nature of PSA Matrix in conveying applications. It has “0” flammability, “0” reactivity, and “0” health rating on the HMIS rating scale making it extremely safe to use. It is not subject to break down in extreme heat like oil systems and it does not leave a sticky residue in the duct like soapy water systems.

The See-Through container lets you track silicone usage and inventory

Since 1989

The new **Model 2000 Silicone Mister System** finally allows plants to tame the problems associated with efficiently transporting matrix in pneumatic conveying systems; whether it is, delaminated trim or label matrix.

The Model 2000 system automatically meters out the exact quantity of needed silicone, at the optimum pressure, on a timed basis. A new See-Through, graduation marked, silicone storage container makes it easy to track inventory.
